Joint FAO/IAEA Programme of Nuclear Techniques in Food and Agriculture

Workshop on

“Sterile Insect Production and Quality Control”

1/2 November 2007, Doubletree Plaza, Montréal.

In conjunction with the

11th Workshop of the IOBC Global Working Group on
Arthropod Mass Rearing and Quality Control.

The Joint FAO/IAEA Programme of Nuclear Techniques in Food and Agriculture is holding a workshop on Sterile Insect Production and Quality Control on 1 and 2 November 2007 immediately following the final session of the AMRQC meeting (13:00). The workshop will provide the opportunity and time for additional discussions beyond that available in the SIT session of the AMRQC meeting to discuss all aspects related to quality control in the mass-rearing of insects for the sterile insect technique. Speakers will be allocated 30 minutes for their presentation and discussions, followed by a round table discussion session on the Friday afternoon. The workshop will be held in a meeting room in the Doubletree Plaza.

Anyone with an interest in mass-rearing insects is welcome to attend. Those proposing to attend should register with the organizer by email, stating the title of their presentation. There is no fee for registration.
